

Quick Start: Power BI

You have taken the first step in empowering your organization through data by investing in Microsoft Power BI. How do you capitalize on the data you have unlocked?

Power BI enables you to build a culture of data, an environment where every team and individual has the ability to do great things because the data is at their fingertips. You are in a great position to take advantage of the insights your data will bring.

The **Quick Start: Power BI** offers a framework for your business intelligence. This series of three half-day workshops is designed to surface the full capabilities of Power BI while also engaging your data to pull together dashboards and reports that will empower your business users immediately:

Session 1

An introduction into Power BI Desktop –connecting, transforming, modeling and visualizing with your data.

Session 2

Move from the desktop to Power BI Service –workspaces, dashboards and data set management.

Session 3

Once you have explored Power BI Desktop and Service dive into the depths of the tool with report tool tips, drill-through pages, buttons and bookmarks, Q & A (Author and Consumer), parameters and export to PDF.

I'm ready to Quick Start Power BI, but...

What will we gain?

- An understanding of how Power BI can easily transform complex data into easily digestible formats for different audiences
- The ability to connect to, import, and transform data from a variety of sources
- An education on how to author reports and create operational dashboards
- Learn how to share your dashboards with others
- Learn how to create a wide variety of data visualizations
- An introduction to dynamic reports

How will it work?

1. In-Person Half-Day Power BI Desktop Workshop
2. In-Person Half-Day Power BI Service Workshop
3. In-Person Half-Day Power BI Deep Dive Workshop

Investment*

\$4,000

**Price is fixed fee and includes all professional services and travel expenses (if within 60 miles of Red Level's corporate office in Novi, MI otherwise travel expenses would be additional).*
