

Quick Start: Azure Fundamentals

REDLEVELGROUP.COM

Ready to discover how Microsoft Azure can help transform your organization?

The first step any organization should take is to learn and understand the fundamentals of Azure.

DETROIT

40200 Grand River Ave.
Suite 200
Novi, MI 48375

GRAND RAPIDS

15 Ionia Ave. SW
Suite 270
Grand Rapids, MI 49503

616-776-1600

The **Quick Start: Azure Fundamentals** provides you and your team with a structured approach for obtaining the knowledge necessary prior to any planning and implementation activities.

The engagement consists of:

» Cloud Concepts

Understand the benefits and considerations of using cloud services, the difference between IaaS, PaaS, and SaaS, and the differences between public, private, and hybrid cloud models.

» Core Azure Services

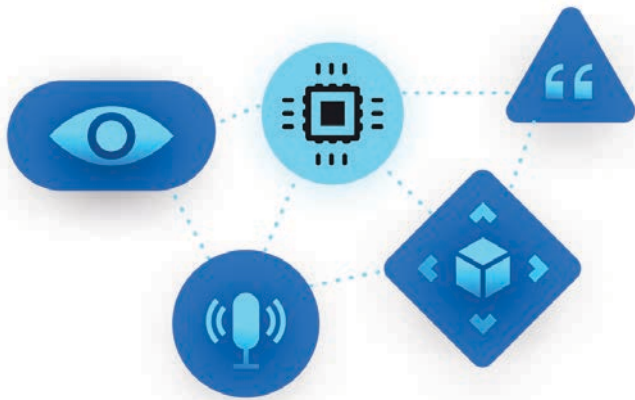

Understand the core Azure architectural components (e.g., Regions, Availability Zones, Azure Resource Manager), some of the core products available in Azure (e.g., Virtual Machine Scale Sets, Virtual Network, VPN Gateway, Block Storage, Disk Storage, Azure SQL Database), some of the solutions available on Azure (e.g., IoT Fundamentals, Azure Machine Learning Service, Azure Functions, Logic Apps), and Azure management tools.

» Security, Privacy, Compliance, & Trust

Understand securing network connectivity in Azure, core Azure Identity services, security tools and features of Azure, Azure governance methodologies, monitoring and reporting options in Azure, and privacy, compliance, and data protection standards in Azure.

» Understand Azure Pricing & Support

Understand Azure subscriptions, planning and management of costs, support options with Azure, Azure Service Level Agreements (SLAs), and the service lifecycle in Azure.

I'm ready to Quick Start Azure Fundamentals but...

What will we gain?

- » An understanding of cloud concepts.
- » An understanding of core Azure services.
- » An understanding of security, privacy, compliance, and trust in Azure.
- » An understanding of Azure pricing and support
- » A digital reference guid mapping the Azure concepts covered in the workshop to the latest version of the corresponding in-depth Microsoft Azure documentation

How will it work?

1. In-Person Full Day workshop delivered by a Microsoft-certified Azure architect
2. Azure Reference Guide & Documentation

Where do I start?
