

Quick Start: Microsoft PowerApps

REDLEVELGROUP.COM

Mobile app use in the consumer market has skyrocketed, it makes sense that the enterprise market is following.

Traditional mobile application development, publishing to the Apple and Google stores, can be time-consuming and expensive. With these burdens, the mobilized workforce vision has been out of reach.

Break that mold -leverage your existing infrastructure of Office 365 to build the mobile application of your productivity dreams with Microsoft PowerApps. But how do you get started?

PowerApps

DETROIT

The Quick Start: Microsoft PowerApps places the power of mobility into your hands. This series of 4 half-day sessions are designed to get you started by combining learning, mentoring, and hands-on coding of your own mobile application.

» Understand

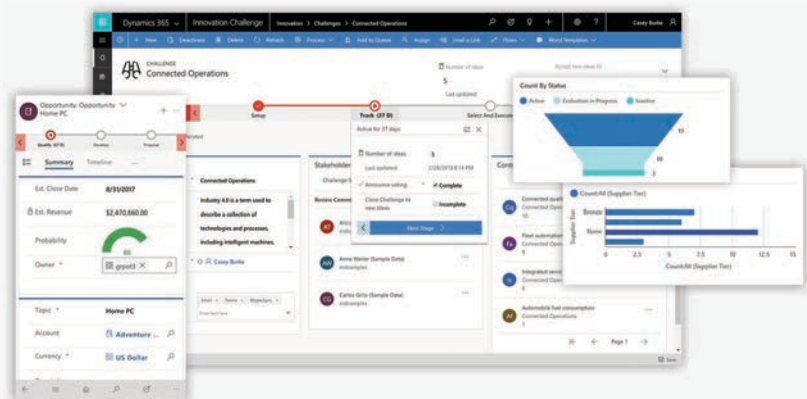

The first two sessions are dedicated to learning how to build in Microsoft PowerApps. An experienced developer and facilitator will lead you through features and best practices.

» Design

In the third session you will design, plan and begin development of a mobile application for your organization. We will analyze a current application need and design and plan the components required to make it a reality.

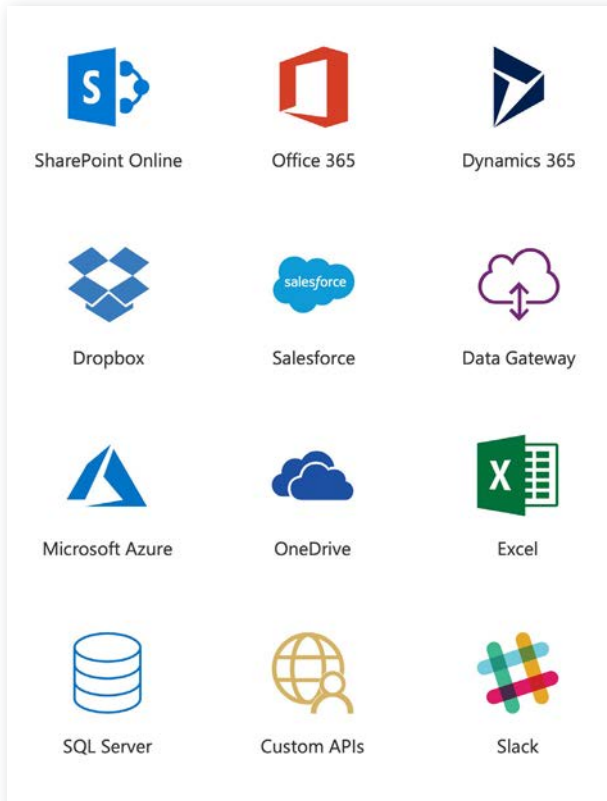

» Build

During the last session you will finish building your PowerApp while working through best practices with your consultant.

Connect your apps to data

Red Level and PowerApps make it easy to get your data into your apps with more than 200 connectors for many popular cloud services and even your on-premises data.

I'm ready to Quick Start Mobile Apps, but...

What will we gain?

- » Hands-on learning of the Microsoft PowerApps platform
- » Learn best practices for PowerApps mobile development from expert developers and trainers
- » Design and develop a mobile application with PowerApps within your own tenant and environment.
- » Build your own ready to use mobile app to improve productivity
- » Post workshop support

How will it work?

1. **Half-Day Workshop 1:** Understanding of development best practices & PowerApps usage
2. **Half-Day Workshop 2:** Design and Plan your custom mobile application
3. **Half-Day Workshops 3 & 4:** Develop and Deploy your custom mobile application
